

Bitdefender protects the Danish state

After an offering, the Modernization Agency (Moderniseringsstyrelsen), on behalf of the Danish government, selected Bitdefender as one of two security software vendors to take care of IT security in the Danish state. As a result, Bitdefender is now implementing security software with a wide range of ministries and their associated authorities.

The selection process

The selection of Bitdefender was the Modernization Agency's determination based on the criterion of "Quality", the Modernization Agency assessed Bitdefender to have offered a quality that is between "very good and excellent".

Brian Ziegler, Nordic Sales Director of Bitdefender, since Modernization Agency's decision, has been busy visiting Ministries and other government departments Honey, Armed Forces, Prison Service, Police, etc. who would like Bitdefender IT protection. With regard to the Modernization Agency's selection, he said, "Bitdefender is a pedigree European security software that has achieved international success. We already have several Danish municipalities and private companies as customers, partly because of the high security of our products deliver, and partly due to our unique solutions for virtualized IT environments that lower consumption of resources and minimize administrative overhead."

“ ... based on the criterion of “Quality”, the Modernization Agency assessed Bitdefender to have offered a quality that is between “very good and excellent” ”

Modernization Agency

Modernization Agency was established on 31.st October 2011 and brings together the Ministry of Finance work with financials, agreements and management in the state. The aim is to create a strong basis for unlocking the considerable resources that lie in the modernization of the public sphere, better public financial management and better governance. The core of the Modernization Agency's work is continually trying to create a more efficient public sector and free up resources so that the Treasury can act as a role model for efficiency, operation and development of the public sector in Denmark.

Bitdefender®

GravityZone Success Story

Content of the agreement

The agreement provides security software for effective protection against viruses, phishing attempts, ransomware attempts and other malware protection for clients like PC, MAC and Linux, all server types, as well as mobile devices like Android and iPhone. There is also a mail solution and a gateway-based scanning solution for network traffic.

The State's large virtual environments are among those being protected by Bitdefender GravityZone Security for Virtualized Environments (SVE), the solution that manages and ensures security of the virtual environments.

SVE is specially designed to work with all types of hypervisors and solves the traditional challenges in virtual environments, giving the State great advantages in terms of high security, low resource consumption on the physical side, and a lower administrative time consumption.

From the central GravityZone console, it is possible for the Authority to manage all physical devices, mobile devices, and all types of virtual clients and server machines. In addition, events are sent to the authority's preferred monitoring system.

“ *Bitdefender is a pedigree European security software that has achieved international success* ”

Bitdefender is a global security technology company that delivers solutions in more than 100 countries through a network of value-added alliances, distributors and reseller partners. Since 2001, Bitdefender has consistently produced award-winning business and consumer security technology, and is a leading security provider in virtualization and cloud technologies. Through R&D, alliances and partnership teams, Bitdefender has elevated the highest standards of security excellence in both its number-one-ranked technology and its strategic alliances with the world's leading virtualization and cloud technology providers.
